3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date 3/23/04 & 7/29/03	5) Notice of In	formal Patent Application (PTO-152)	)

Art Unit: 2833

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

- 2. Applicant is reminded of the proper language and format for an abstract of the disclosure. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The language should be clear and concise.
- 3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the alternative arrangement of claim 3 must be shown or the features canceled from the claim. No new matter should be entered.

The drawings are objected to because Figs. 15-20 should be labeled as **Prior Art**.

4. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application.

Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 2833

5. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

- 6. The disclosure is objected to because the "Summary of the Invention" on pages 8-13 should not repeat the claims. This **Brief Summary of the Invention** should be directed toward the invention rather than the disclosure as a whole. The summary may point out the advantages of the invention or how it solves problems previously existent in the prior art (and preferably indicated in the Background of the Invention). If possible, the nature and gist of the invention or the inventive concept should be set forth. Objects of the invention should be treated briefly and only to the extent that they contribute to an understanding of the invention. See MPEP § 608.01(d). Appropriate correction is required.
- 7. Claims 2-12 are objected to.
- Claim 2 is contradictory. A member (i.e. the completely-retaining member and/or the center retaining member) is a single entity. It cannot be provided in two places as required by claim 2.
- Claim 9 lacks antecedent basis for "the completely-fitted condition" on lines 1-2.
- In claim 10, the meanings of "at outside" (line 19), "at both outsides" (line 24) and "at one outside" (line 26) are unclear.

  Appropriate corrections are required.
- 8. Claim 1 is allowed. Claims 2-12 would be allowable if rewritten or amended to overcome the objections set forth in this Office action. The prior

Art Unit: 2833

art fails to show or teach a connector of the type claimed including elastic retaining arms prevented from movement by a front holder in a completely-retaining position, wherein a completely-retaining member includes an operation portion that is exposed to the exterior and releases the housing from the holder.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Berg, et al. and Endo, et al. show easily releasable retaining members on similar connectors.

10. This application is in condition for allowance except for the formal matters discussed above. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.

11. Any response to this action may be mailed to:

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

or faxed to: (703) 872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Art Unit: 2833

12. Any inquiry concerning this communication from the examiner should be directed to Mrs. Renee Luebke whose telephone number is (571) 272-2009.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mrs. Paula Bradley, can be reached at (571) 272-2800, extension 33.

Renee S. Luebke

Primary Patent Examiner
